

Yet another freedom struggle....  
..... this time for our Little People....

## **CARE FOR CHILDREN**

**An initiative by Dayaa Foundation & Latha Rajinikanth**

A tribute to our Little People.....  
..... **“Care for Children”** .....

Childhood is a blessing given by God....

No one has the right to snatch it away for....

..... it can never ever be given back, replaced, bought or substituted.

What we cannot create, we do not have the right to destroy.....

**- Latha Rajinikanth**

..... **“Care for Children”** .....

- Children need voices to speak for them. They give us their complete trust and faith and surrender themselves in our hands. We will fail in our duty if we do not provide safety, security, protection, support ,love and care along with compassion.
- Every citizen in this world has a duty to any child around them, whether it is theirs or not, because the child is born into the world trusting the adult community as a whole and not just the parents and immediate family alone.

We must feel for the children all over the world and if each one of us can work in our own regions, in our own areas, looking at the children around us and working for their welfare, it would make a big difference to the society.

We see people speaking from platforms for so many causes, but very few voices are heard for three most needed areas:

- infants and children
- senior citizens
- animals

These three categories are total dependants on the nature and character of people around them and on people who handle them.

There are so many factors that define the safety of a child which includes the entire society and community as a whole...

# CARE FOR CHILDREN

## - A National Movement

In the words of our Founder....

The soul of humanity and the nucleus of creation are children. They bring so much happiness to everyone wherever they are with their innocence, divine qualities and positive energy.

They inspire the good in us and bring out the best part of the human in us. In fact, they retain the child in us. When we say children, the word brings a sense of joy and a smile on our faces, but let us stop to think if we say 'adults' to children, will it bring the same smile to childrens' faces at the thought of us?..

“No one in the world can ever give back the wonderful aspects and phase of being a child. This is a gift from God to be pure, divine, full of love and abundant joy. We have no right to disturb, alter, spoil, manipulate, confuse or create chaos in the world of little ones. Born to balance all the negatives of the world with their positive energy, it is a crime to interfere with the natural happiness of children and it is our duty to preserve, cherish and protect their world of innocence, trust and faith in us as adults.

Whenever there is a disturbance in the world, in any community, society, region, family or individuals, the most affected are children..... They are subject to all kinds of human disorders, psychological problems, relationship issues, monetary avariciousness and self centered outlook and just stand helpless as infants, toddlers, little ones who cannot take care or speak for themselves. They just undergo their agonies, bewildered by their plight and this world, where little regard is given to what they so richly deserve.

They come into our adult community and society looking up to us as caretakers, bodyguards and Devatas who are ordained by nature to protect them, cherish, nourish and mould them into great human resources that can preserve this creation and the world given to us. There is no redemption for the human race, if the faith, trust and hope instilled by the children is shaken beyond reason, questioning their very living, basic safety and basic living conditions.

A child can only cry, that it is born in a society that cares so little for its life. Is it the fault of the child to have trusted the human race and reposed faith in our society ? Is it the fault of the child to be underprivileged and be treated like an object, subject to innumerable sufferings thrust on it by a whimsical, self centered, adult society ?

**“Leave alone being heroes for them, let us not become their villains”.**

- Children don't have great demands like adults and the least we can do is to make a world, where they can exist in peace and enjoy the natural happiness they are endowed with by God.
- They look up to us as caretakers with utmost faith, hope and completely depend on what and how we look after them.
- The world seems least sensitive for the needs of children, which is so easy to satisfy if we come together as a community of adults and simply do our duty to take care of them.
- It's a test by God for us, to bring out the best part of us when we deal with children and what defines us as adults is the way we understand our role in the **‘Care For Children’**.

- Let children decorate this world as there are no flowers without buds.
- Let childhood not be snatched away by the cruel hands of society, let no child cry in agony or in despair.
- Let us bring back hope, smile and care into the lives of children and increase the positive energy that they bring all around the world.
- The unconditional love that children give back and the unconditional trust cannot be matched by us how much ever we try.

For making a better world for children and to extend our compassion, love, kindness, tenderness and empathy we bring our work under our movement.....

## **‘CARE FOR CHILDREN’**

We invite every member of the society globally to extend your support and feel what we feel to bring the greatest jewel of a smile back on the faces of children who are waiting to regain what they are born with.

**Coming together for the betterment of humanity.....**

- Everything else can wait ...but the life of a little one cannot..
- The fate of a little life is altered either by right action at the right time ,or lack of action or indifference or lack of awareness ....
- As we are busy doing our mundane routine materialistic things, a little life out there is trying to reach out to us from somewhere asking for basics .....

like.....safety, removal of agony, pain relief from trauma, for no fault of theirs and to just be left to be a child, away from the unpredictable world of adults.....

The main areas of focus for our “**Care for Children**” initiative are -

- Shelter
- Nutrition
- Education
- Medical care
- Safety and Security
- Crime against Children
- Parental Awareness
- Public Awareness
- Vocational Training
- Skill development
- Life Enhancement
- Better overall quality of life

**It is a blessing to be able to serve our Little Gods on earth.....  
.....our children.....**

- There is no substitute for the joy one feels when an infant or a toddler smiles at us..... this is an irreplaceable divine experience, when we feel God embraces us.....
- If the human child is not protected, cared for, loved, nourished, cherished, enjoyed and celebrated, it is a disrespect to the very human race..... and a black mark on the entire humanity.....

**- Latha Rajinikanth**
